

## Why AI

**Most Experienced, longest running boot camps:** Don't settle for contract trainers who baby-sit you while you self-study third party test prep and cram sheets! American Interactive trainers have at least five years of boot camp training experience within our company and wrote the entire course themselves. It's no wonder we are so trusted by America's largest universities, the largest of civilian and military contractors and the US Military! Now after 8 years you can take American Interactive classes yourself at corporate rates!

**State of the art Equipment:** No simulations and no remote logins. Each student works hands-on with state-of-the-art Cisco® equipment. American Interactive uses 2800 series routers and 3550 switches for each student in all Cisco® courses. All Wide Area Networking labs are performed on real Telco equipment.

**Class size:** AI will never run a class with more than 12 students. Most classes are limited to 8 students or less!

**Testing policy:** Yes we cover exam costs, ALL exam costs. We will cover any retakes if needed and we will even cover exam costs should you choose to take the class a second time. Other companies can not offer this as they have too many students repeating the class. You may want to ask the other companies why they don't stand behind their product. If they claim high passing rates, ask that they cover all exam vouchers until you are certified and have them put it in writing.

**Online mentoring and materials:** Before your class begins you will have access to your trainer who also wrote the class you will be attending. Our material is updated for each class we deliver and has been for the last eight years.

**Price:** As an introductory offer American Interactive is offering its courses at extremely low prices to get the word out. Now you can take American Interactive corporate training at our group discount rates!

**Honesty:** We run 80% repeat and referral business per class. We are here to answer your questions. We want your long term business so if we can't help you we will point you in the right direction.
